Based on the most recent internal EPA review, I have revised the letter further. The comments we provided were too detailed in light of the fact that the Navy is supposed to be addressing many of the issues we commented on in the derivative deliverables they have committed to develop and collaborate on. So to include as much detail as did was premature. The comments are still valid, we just need to make them at the appropriate time.

Please let me know if this version is acceptable. If so I would like to get this out to the Navy by COB tomorrow.
